Guide to using a **Visual Calculation Policy**

The Sense of Number Visual Calculation Policy provides an visual representation of a school's written and mental calculation policy.

Typical uses:

Classroom: The slides are printed out (e.g. A4) and the appropriate slides are displayed within each classroom for continual reference or on a working wall.

Teacher Reference: The slides are printed out (e.g. 9 slides per A4 page) and inserted in the teacher's planning folder.

Parents: The slides are used to communicate to parents the methods being taught and used within school.

Website: Slides from the VCP are inserted on a schools' maths webpages.

(Please note: the VCP should not be made available for download)

A1: Objects & Pictures

“If I have **3** and then **5** more, how many altogether? Answer: **8**”

A2: Counting On

+1 +1 +1

$$5 + 3 = 8$$

A3: Forwards Jump

$$43 + 24 = 67$$

A4: Partitioning

$$40 + 20 = 60$$

$$3 + 4 = 7$$

$$67$$

A5: Partition Jot

$$43 + 24 = 67$$

The diagram illustrates the partitioning of the numbers 43 and 24 into tens and ones. The number 43 is split into 40 (red) and 3 (green). The number 24 is split into 20 (green) and 4 (red). These are then combined to form 60 (red) and 7 (green), which sum to 67.
